More Than Just Cable.
A Simpler Path to FHIT.25E Compliance.

Prysmian now stocks select FHIT.25E system components to help simplify specification, procurement, and installation of Lifeline® RHW-2 fire-resistive cable systems.

By offering more of the listed system in one place, Prysmian helps reduce sourcing complexity and gives engineers, contractors, and distributors a clearer path from specification to installation.

Why Buy Through Prysmian?

Simplify Procurement: Consolidate key FHIT.25E components through a single source.

Support System Compliance: Stocked components align with FHIT.25E system requirements.

Streamlined Installation: Critical components available alongside cable orders.

Technical Support Included: Installation reviews and design assistance available.

Stocked System Components

Lifeline® RHW-2 Cables
Power cables UL 2196 certified and listed for two-hour fire resistance. Available in sizes 14 AWG – 750 kcmil

RACO All-Steel EMT Fittings
Set-screw connectors and couplings for EMT conduit in dry locations.
Sizes: 1½–4 in.

Wiegmann NEMA 3R Hinged Pull Boxes
Junction and vertical support pull boxes.
Sizes: 16×16×6 in., 24×24×8 in., and 36×36×12 in.

Pull Box Cable-Support Bushing Kits
Silica-fabric bushings and glass cloth tape for cable pass-through and vertical-support applications.

Need an FHIT.25E System Package?

Prysmian can assist with:

- Cable selection
- Conduit sizing
- Pull box sizing
- Component selection
- Installation reviews
- Letters of compliance*
