

Aluminum Building Wire U.S. Product Offering

STABILOY® Aluminum Building Wire

Prysmian Group's comprehensive STABILOY® aluminum building wire product line supports the commercial, residential and industrial construction markets. Our superior, high-quality aluminum building wire products are made in state-of-the-art manufacturing facilities, delivered with the excellent service that our customers can count on.

STABILOY® Brand has been the standard in quality, reliability, cost-effective installation savings and long-term performance, with aluminum building wire products used in commercial and residential applications for over 50 years.

All our aluminum building wire products are in-stock and available to fulfill our customers' needs immediately.

Quality

It's a fact. STABILOY® aluminum cables are 100% tested for quality – its reliability, durability and safety are all guaranteed!

Performance

High-quality STABILOY® cables features a unique composition of metals that is specially engineered for superior performance in building feeder applications.

Ease-of-use

STABILOY® cable is much easier to install. Maintenance for STABILOY and copper cables is equal. This makes it more time-efficient and more cost-effective as well..
