

Prysmian® Copper Building Wire

Our Copper Building Wire product line includes a broad spectrum of copper products that range from 600 to 2,000 volts. Our products support the countless markets while delivering the product quality, manufacturing expertise and service, that our customers have always received from the Prysmian Group.

Prysmian® high-quality copper building wire is manufactured in the U.S. and delivers long-term, reliable performance in many Commercial & Industrial building applications.

Quality

It's a fact. Prysmian® copper cables are 100% tested for quality – its reliability, durability and safety are all guaranteed!

Ease-of-use

Prysmian® copper cables feature Easy Glider®, extra low-friction jacket designed for ease of installation and labor savings even under the most challenging conditions.

Service

Prysmian cable services include long-length reels, cut-to order, parallel and stacking reels, pulling eyes, and wood lagging.
