

Prysmian to Showcase Advanced Cabling Solutions for Security Pros at ISC West 2026

Highland Heights, Ky., March 17, 2026 – **Prysmian**, a world leader in energy and data wire and cabling solutions, will showcase its latest innovations for the alarm and security industry at [ISC West 2026](#), taking place March 23–27, 2026, in Las Vegas. Exhibiting at Booth #2129, Prysmian will highlight advanced cabling solutions designed to support the evolving needs of security professionals and installers.

Prysmian's [alarm and security cables](#) provide solutions in diverse environments, including commercial buildings, residential homes, schools and universities, business campuses, public stadiums, airports, trains, buses, and other transportation hubs.

Prysmian products are designed for seven key areas where alarm and security cables are essential: Access Control, Video Surveillance/CCTV, Component Video, Lighting Control and Touch Panel Systems, Fire Alarm and Life Safety, Home Theater, and Burglar Alarms – showcasing the company's expertise within the security field.

Visitors to Booth #2129 will see a broad portfolio of cabling solutions spanning traditional, specialty and advanced products in physical and digital security:

- **[Encore Wire's MC Aluminum Armor Fire Alarm & Control Cable](#)** is designed for fire alarm, signaling and control applications, combining copper conductors with lightweight interlocked aluminum armor for strong mechanical protection. Ideal for demanding environments such as power generation, airports, military bases, schools, and transit projects, it delivers durable, code-compliant performance that reduces labor time and safeguards critical systems.
- **[GenSPEED® 6 MAX Category 6 Cable](#)** is a high-performance, versatile data cable designed to support demanding security, data and voice applications with superior headroom for bandwidth and signal integrity.
- **[CAROL® Helix Product Portfolio](#)** features Category 5E and Category 6 MAX cables engineered for reliable data transmission, enhanced PoE delivery for cameras and access control, and extended run lengths that reduce labor. Designed for high-temperature environments, the larger-gauge CAT6 MAX cable delivers superior performance and versatility for modern security and building automation systems.
