

Prysmian to Highlight New Cat 6A Traveling Cable Solutions at CECA Convention

Highland Heights, Ky., June 10, 2026 – **Prysmian**, the world's largest cable and wire manufacturer based in the Cincinnati region, will showcase its latest innovations for vertical transportation available through its **Draka EHC** brand at the 52nd annual Canadian Elevator Contractors Association (CECA) Convention.

Exhibiting June 15-18, 2026, in Victoria, British Columbia, the Draka EHC booth will highlight its recently introduced UL-approved Cat 6A traveling cables, available in both round and flat designs. The Cat 6A cables offer many benefits to operators, including:

- **Performance:** Up to 10 Gb/s speeds and 500 MHz bandwidth
- **Reliability:** Shielded pairs reduce EMI and crosstalk
- **Compliance:** Meets NEC Type ETT and ANSI/TIA standards; UL-approved
- **Integration:** Standard RJ-45 termination
- **Versatility:** Works with various devices
- **Configurations:** Super-Flex® round with lifetime warranty

Traveling cables will also be the subject of a speaking session facilitated by **Dillard Green, Product Engineering Manager for Prysmian's Draka EHC**, on June 16. The session, titled "Travel Cables Reimagined: A Journey Through Innovation," will provide an overview of the evolution of traveling cable and a look at the latest innovation trends.

"Modern elevator systems require increasingly sophisticated communications infrastructure to support connectivity, safety, and performance," Green said. "We're excited to share how traveling cable technology continues to evolve and help industry professionals prepare for the next generation of vertical transportation systems."

In addition to the new Cat 6A traveling cables, Draka EHC offers a comprehensive portfolio of value-added products, services, and integrated solutions for elevators, escalators, ramps, and moving walks. Convention attendees will have the opportunity to learn more about the company's cable technologies, handrail solutions and other products engineered to support reliable performance and long-term system operation.
