

Deadbreak Jacket Seal Kits

DESCRIPTION

Prysmian Jacket Seal kits are cold shrink tubes expanded on a spiral carrier tube for re-jacketing of medium voltage and other power cables. These kits should be used when the jacket of a power cable is removed, and a moisture seal must be reconstructed. Water blocking mastic is included in each kit and installation is quick and easy by unwinding the cord, shrinking the jacket seal over the desired area.

BASIC DIMENSIONS

KIT INCLUDES:

- Cold Shrink Jacket Seal
- Sealing Mastic

FEATURES

- Range Taking
- Submersible solution for re-jacketing medium voltage power cables

PRODUCT OFFERING

Catalog ID	Minimum Seal Diameter	Maximum Seal Diameter	Nominal Relaxed Tube Length	Typical Prysmian Cable Adapter Range
S4000	0.65	1.69	7.87	Cable Adapters E - H
S4100	1.34	2.99	7.87	Cable Adapters J - R

Units are in inches.

NOTE: When sizing, confirm the seal diameter range is compatible with the cable as well. Adjust your selection as needed. If you need assistance, contact your Prysmian representative.
