

Deadbreak Jacket Seal & Grounding Kits

DESCRIPTION

Prysmian Jacket Seal kits are cold shrink tubes expanded on a spiral carrier tube for re-jacketing of medium voltage and other power cables. These kits should be used when the jacket of a power cable is removed, and a moisture seal must be reconstructed. These kits are designed for use on LC and Tape Shielded cables. All components needed to connect to the shield is included and installation is quick and easy by unwinding the cord, shrinking the jacket seal over the desired area.

BASIC DIMENSIONS

KIT INCLUDES:

- Cold Shrink Jacket Seal
- Sealing Mastic
- Constant Force Spring
- Tinned Copper Braid with Bleeder Wire

FEATURES

- Range Taking
- Submersible solution for re-jacketing medium voltage power cables

PRODUCT OFFERING

Catalog ID	Minimum Seal Diameter	Maximum Seal Diameter	Nominal Relaxed Tube Length	Braid Size	Typical Prysmian Cable Adapter Range
