

ALL-TEMP(K) INDUSTRITE® Power

Festoon and Reeling Power Cable / -40° C to 90° C / 8 AWG - 1000 KCMIL Thermoset Jacket / 2000V

Application

ALL-TEMP(K) INDUSTRITE® Power Cable is designed and manufactured for use in continuous flexing, twisting, and other abusive physical applications where flame, abrasion, chemicals, moisture, impact, tearing, and temperature extremes are considerations. Applications include portable power, spring and motor driven reels, festoon systems, power tracks, cable tenders, cranes and hoists.

ALL-TEMP(K) INDUSTRITE® cables are suitable for use indoors and outdoors on magnet cranes, barges, milling machines, mining equipment, and oil rigs, and are suitable for installations in water including aerator ponds.

Specifications and Ratings

- Rated for Continuous Operation at -40° C to 90° C
- UL Listed (E130231) Type W 2000 volts 90° C Wet or Dry
- Certified CSA (LL231593) Type W, 2000 volt, FT1 and FT5
- UL Festooning
- RoHS Compliant

Construction Options

Consult factory for cables designed and manufactured in a variety of alternative constructions for specific applications,

Options include:

- Overall Shields and Armor
- composite Conductors
- Fiber Optic Components
- Cold Temperature Thermoset Jacket Compound for -50°C Rating
- MSHA Approval
- Green/Yellow Stripe Neutral

Design Parameters

CONDUCTORS: Extra-flexible rope stranding (Class K), soft-drawn uncoated copper per ASTM B-3, ASTM B-172, and UL-62 offers high flexibility, extended flex-life and reduced copper fatigue/conductor breakage.

SEPARATOR: Separator tape for easy stripping.

INSULATION: Black thermoset (EPDM) insulation. Excellent physical and electrical properties, insulation has printed color code for easy conductor identification, suitable for use in extreme flexing applications.

CABLING: Conductors are cabled with non-wicking, non-hygroscopic fillers, without a separator which allows pressure-extruded jacket to fill interstices and prohibits conductor displacement during flexing operations.

JACKET: Available in stock with black, oil and flame-resistant, double-layer, reinforced thermoset jacket per UL-62 and ANSI/NEMA WC 58 ICEA S-95-381, suitable for use indoors and outdoors in abusive flexing applications where oil, chemicals, and extreme temperatures are considerations.

Available Jacket Colors:

Note: The use of basket-weave grips, a minimum of 12" in length, is recommended for prolonging cable life.

Single conductor versions are available from 8 AWG to 1000 KCMIL.
