

2kV ECOSAFE™ RHW-2

Low Voltage LSZH Cables

Description

Single conductor 2kV RHW-2 non-halogenated cable with stranded copper conductors, extruded insulation system consisting of a thermosetting EPR-based insulation, and a thermosetting polyolefin outer insulation.

Specifications

ICEA: S-95-658

UL: 1685 ST1

IEEE: 1202 Flame Test

NFPA: 130 Code Compliant
502 Code Compliant

For 90°C wet or dry operation

Ratings

Type II EPR

Type RHW-2, Class XL
FT4/ST1 (Low Smoke)
VW-1
For CT USE (1/0 AWG and Larger)
Oil Resistance II
Sunlight Resistant (black, red,
grey and dark colors)

Design Parameters

CONDUCTOR: Annealed, Class B, concentric compressed, round, bare copper strand as standard. Other optional strandings per ASTM are available for increased flexibility.

INSULATION: A dual-layer product where the inner and outer layers are co-extruded, resulting in a tightly bonded system. The inner layer utilizes an EPR-based compound and is optimized for superior electrical properties. The outer layer is EVA-based cross-linked polyolefin and is specifically formulated to provide a rugged outer covering, with the additional benefits of limited smoke and halogen-free materials.

Options

- 600V option available on request
- Class C, Class D, Class G and Class I conductor strandings per ASTM
- Tin-coated conductor
- True Colors and Striping
- CSA Listed product available on request
- Sizes up to 2000KCMIL available upon request

Installation

- Conduit In Air
- Underground Duct
- Wet Locations
- Isolated In Air
- Direct Buried
- In Cable Tray
- Dry Locations
