

- Multiplex Underground Distribution Cable
- 600 Volt Type USE-2/RHH/RHW-2
- AA-8000 Series Aluminum Compact Conductor
- XLPE Insulation UL Listed

600 Volt tri-rated lead-free XLPE insulated underground distribution cables in duplex and triplex configurations are designed for secondary power distribution circuits. They are rated for 90°C maximum conductor operating temperature in wet or dry locations, resistant to abrasion, impact and sunlight, and meet all applicable requirements of ANSI/ICEA Standard S-105-692 and UL Standard 854. PowrServ is listed as a tri-rated Type USE-2/RHH/RHW-2 cable and may be installed direct buried or in duct or conduit. The cables consist of two or three aluminum alloy phase conductors and one neutral conductor that are insulated with extruded black cross-linked polyethylene. The conductors are a compact stranded AA-8000 series aluminum alloy recognized by ASTM Standards B800, B801 and B836.

Application:

Primarily used as Type USE-2 direct-buried underground service entrance but also listed for RHH and RHW-2, making it suitable for applications in raceways for general purpose lighting and power circuits. This multiple listing offers a unique advantage to the installer to purchase one product that is suitable for installation on both sides of the service point and where the service point is located within the envelope of the building.

Options:

- AA-8000 series aluminum compressed conductor
- 3 extruded white stripes (EWS) on neutral
- Other constructions available upon request
